

MD MUBASHEER AHMED

Ballari, Karnataka, India | +91 901966519 | mubasheerx19@gmail.com
[LinkedIn](#) | [GitHub](#)

Profile

Third-semester Bachelor of Engineering student specializing in Computer Science and Engineering with a focus on Data Science. Strong foundation in C, C++, Python, and Java with an interest in Data Science, Artificial Intelligence, Machine Learning, and problem solving. Currently developing practical programming, data analysis, and machine learning skills through academic learning and hands-on projects. Motivated to gain industry exposure through internships, technical projects, competitions, and research-oriented opportunities.

Education

Ballari Institute of Technology & Management (BITM) <i>Bachelor of Engineering (B.E.)</i> <i>Computer Science and Engineering – Data Science</i> Current Semester: 3rd Semester <i>Expected Graduation:</i> 2029	<i>Ballari, Karnataka</i> CGPA: 8.0/10
Nandi PU College <i>Pre-University Course (PUC)</i> Percentage: 75%	<i>Karnataka</i>
Nandi State Board <i>Secondary School / 10th Standard</i> Percentage: 96%	<i>Karnataka</i>

Career Interests

Data Science	Artificial Intelligence	Machine Learning
--------------	-------------------------	------------------

Technical Skills

Programming Languages	C, C++, Python, Java
Data Science	Data Analysis, Data Preprocessing, Data Visualization, Statistical Fundamentals
Artificial Intelligence	AI Fundamentals, Machine Learning Fundamentals
Computer Science	Data Structures and Algorithms, Object-Oriented Programming, Problem Solving
Database	SQL – Beginner Level
Web Technologies	HTML, CSS, JavaScript – Beginner Level
Development Tools	GitHub, Visual Studio Code
Version Control	Git and GitHub Fundamentals

Academic and Technical Projects

Student Performance Prediction	<i>Python, Pandas, Machine Learning</i>
- Developed a beginner-level machine learning project for analyzing academic data and predicting student performance. - Performed data cleaning, preprocessing, and exploratory data analysis to identify patterns in the dataset. - Applied introductory machine learning techniques and evaluated model performance using appropriate metrics. - Created basic data visualizations to communicate insights from the academic dataset.	

Personal Portfolio Website	<i>HTML, CSS, JavaScript</i>
-----------------------------------	------------------------------

- Designed and developed a responsive personal portfolio website to showcase academic background, technical skills, projects, and contact information.
- Created structured pages with a simple and user-friendly interface.
- Organized and maintained the project source code using GitHub.

Student Management System

C++, OOP, SQL

- Developed a basic application for managing student records including adding, searching, updating, and deleting information.
- Applied object-oriented programming concepts to structure the application and improve code organization.
- Implemented basic database operations for storing and retrieving student information.

SAMPLE PROJECTS – Replace these with your actual projects.

Relevant Coursework

Data Structures and Algorithms	Object-Oriented Programming
Database Management Systems	Computer Networks
Python Programming	Machine Learning Fundamentals
Data Science Fundamentals	Software Engineering
Discrete Mathematics	Computer Organization

Certifications and Learning

• Python Programming Fundamentals	Sample
• Introduction to Data Science	Sample
• Git and GitHub Fundamentals	Sample

Research Interests

- Machine Learning and Predictive Analytics
- Artificial Intelligence and Intelligent Systems
- Data Analysis and Visualization
- Natural Language Processing
- Applied Data Science

Hackathons and Competitions

- Developing programming and problem-solving skills in preparation for coding competitions and hackathons.
- Exploring opportunities to participate in university-level technical events, hackathons, and coding competitions.

No competition wins or participation claims added without actual information.

Achievements

- Achieved **96%** in Secondary School / 10th Standard.
- Maintained an academic CGPA of **8.0/10** in the Bachelor of Engineering program.
- Pursuing undergraduate specialization in Computer Science and Engineering with a focus on Data Science.

Professional Development

- Continuously improving programming skills in C, C++, Python, and Java.
- Developing foundational knowledge in Data Science, Artificial Intelligence, and Machine Learning.
- Practicing data structures, algorithms, and problem-solving techniques.
- Using GitHub to maintain and organize programming projects.
- Exploring opportunities for internships, technical competitions, and research-oriented learning.

Experience

No formal internship or professional work experience currently.

Currently seeking opportunities to gain practical industry experience in Data Science, Artificial Intelligence, Machine Learning, and software development.

Research and Publications

No research publications currently.

Interested in undergraduate research involving Data Science, Artificial Intelligence, Machine Learning, predictive analytics, and applied data-driven systems.

Extracurricular Activities

- Exploring technical projects and practical applications related to Data Science and Artificial Intelligence.
- Practicing programming and problem solving through self-learning and academic activities.
- Maintaining personal programming work and learning resources through GitHub.

Professional Skills

Problem Solving	Analytical Thinking
Communication	Team Collaboration
Continuous Learning	Adaptability
Time Management	Technical Curiosity

Languages

English	Hindi	Kannada	Telugu
---------	-------	---------	--------
