Professional Summary

Third-year Bachelor of Engineering student specializing in Computer Science and Engineering with a focus on Data Science. Strong foundation in C, C++, Python, and Java with an interest in software development, data science, machine learning, and problem solving. Familiar with GitHub and Visual Studio Code and actively developing practical programming projects to strengthen technical and analytical skills.

Education

Ballari Institute of Technology & Management (BITM) <i>Bachelor of Engineering (B.E.) – Computer Science and Engineering-Data Science</i> CGPA: 8.0/10	<i>Ballari, Karnataka</i> <i>Currently in 3rd Year</i>
Pre-University / 12th Standard <i>NANDI PU COLLEGE</i>	<i>BALLARI, KARNATAKA</i> <i>Percentage / CGPA: 75</i>
Secondary School / 10th Standard <i>NANDI STATE BOARD</i>	<i>BALLARI, KARNATAKA</i> <i>Percentage / CGPA: 96</i>

Technical Skills

Programming Languages	C, C++, Python, Java
Core Concepts	Data Structures and Algorithms, Object-Oriented Programming, Problem Solving
Data Science	Data Analysis, Data Visualization, Machine Learning Fundamentals
Tools	GitHub, Visual Studio Code
Web Technologies	HTML, CSS, JavaScript – Beginner Level
Database	SQL – Beginner Level

Projects

Student Performance Prediction	<i>Python, Machine Learning</i>
- Developed a machine learning project to analyze student academic data and predict performance. - Performed data preprocessing and exploratory data analysis to identify patterns and relationships within the dataset. - Implemented introductory machine learning models using Python and evaluated their performance. - Created basic visualizations to communicate insights from the academic dataset. <i>GitHub: github.com/basheerx19-source</i>	

Personal Portfolio Website	<i>HTML, CSS, JavaScript</i>
- Designed a responsive personal portfolio website to showcase education, technical skills, projects, and contact information. - Created a clean and user-friendly interface with structured sections for personal and academic information. - Used GitHub for source-code management and project version control. <i>GitHub: github.com/basheerx19-source</i>	

Student Management System	<i>C++ / Java, SQL</i>
- Developed a basic student management application for maintaining student records. - Implemented operations such as adding, searching, updating, and deleting student information. - Applied object-oriented programming concepts to organize application logic and improve code structure. <i>Temporary project – replace with an actual project.</i>	

Relevant Coursework

Data Structures and Algorithms	Object-Oriented Programming
Database Management Systems	Computer Networks
Python Programming	Machine Learning Fundamentals
Data Science Fundamentals	Software Engineering

Certifications

• Python Programming Fundamentals	Temporary Placeholder
• Git and GitHub Fundamentals	Temporary Placeholder
• Introduction to Data Science	Temporary Placeholder

Achievements & Activities

- Actively developing programming and problem-solving skills through academic and personal projects.
- Exploring software development, data science, and machine learning through practical learning.
- Maintaining programming projects and learning resources using GitHub.

Hackathons & Competitions

- Exploring opportunities to participate in hackathons, coding competitions, and technical events.
- Practicing programming and problem-solving concepts to prepare for technical competitions.
